EDUCATION

California Polytechnic State University

Bachelor of Science in Software Engineering

San Luis Obispo, CA

Expected June 2028

- Relevant coursework: System Software Mechanics, Algorithms and Complexity

College of the Canyons

Associate of Science for Transfer in Computer Science, Math, & Physics

Valencia, CA

August 2024 - June 2026

- GPA: 3.85
- Relevant Coursework: OOP, DSA, Linear Alg., Differential Equations, Discrete Math, Statistics, Java, C++
- Awards: Dean's Honor List (4 semesters), MESA Outstanding Service Award, MESA 4.0 Honor Roll

Certifications

- Cornell University - Machine Learning Foundations, Break Through Tech May - July 2026
- Amazon Web Services-AI Practitioner, Building GenAI Applications with Bedrock July 2026

TECHNICAL SKILLS

- Languages: Python, Java, C++, C, HTML, JavaScript, CSS
- Tools & Platforms: AWS Bedrock, AWS S3, MoviePy, ElevenLabs, Gemini API

EXPERIENCE

AI/ML Fellow @ Amazon (via Break Through Tech)

August 2026 - Present

- **Architected an ML early-warning churn detection system** using time-series feature engineering, lifecycle clustering, and classification algorithms, defining a 90-day forward-looking inactivity boundary to eliminate temporal data leakage.

Break Through Tech AI/ML Fellow @ Cornell Tech

April 2026 - Present

- Selected from pool of 4,300+ applicants for a competitive, technical 12-month AI program
- Master industry-standard ML tools to **build data analysis pipelines, train models, and validate ML solutions to resolve business problems**. Gaining skills with Matplotlib, Numpy, Pandas, & Seaborn.
- Work with an industry mentor at Amazon to build a tool for early churn detection using generative AI

LEADERSHIP & VOLUNTEER EXPERIENCE

MESA Skills Lab - Lead of Computer Science & AI Department

June 2025 - June 2026

- Instructed labs to 100+ students, boosting program participation and engagement in STEM subjects for first-generation and low-income students.
- Supervised CS labs, trained student instructors, partnered with local high schools to broaden STEM access.
- Introduce new labs in dedicated pathway with AI, Java, Python, and AWS. Analyzed feedback from previous participants to optimize curriculum progression and increase participation.

MESA Skills Lab Summer BRIDGE Program - Lead of Engineering

June 2025

- Directed development and delivery of 64+ hours of STEM workshops for 25+ incoming LatinX students, covering programming, soldering, & SolidWorks via student-led projects for practical skills and experience
- Achieved significant student learning outcomes and secured a \$6,000 grant to fund future programs.
- Trained instructional team of 7, coordinated logistics, and ensured all workshops met learning objectives.

PROJECTS

Email Router for Foothill-DeAnza CC | Microsoft Graph API, AWS: Lambda, s3, Eventbridge

July 2026

- <https://github.com/sanchitamodi/MailFlow>
- Lead of backend dev for an event-driven serverless system deployed on AWS Lambda to **automate processing, classification, and auto-forwarding** for incoming Accounts Payable (AP) emails.
- Solution **saves client ~20-25 hours** weekly by fully automating manual sorting of ~200 emails daily.

Onama - AI Foley Artist | Python, MoviePy, ElevenLabs, Gemini

May 2026

- <https://devpost.com/software/onama>
- **Award:** Sponsor Award for the **Best use of ElevenLabs** at HACKMESA 2.0 out of 35 teams
- Engineered a tool to generate audio for silent videos based on the contents of the video using Gemini, and ElevenLabs APIs for **multimodal content analysis and sound generation**.
